HILORIA FILLERS & SKIN BOOSTER

Unlock Timeless Beauty
Intrinsic Glow

Let's begin...

Biocell lab

Company Introduction

We are a biomedical company based in both Seoul and Hong Kong, committed to providing exceptional fillers to the global market. Our endeavors include two key projects: manufacturing and supplying fillers worldwide, and assisting in the establishment of Smart Filler Plants globally. As a leader in medical devices, we continuously invest in research, maintain state-of-the-art manufacturing facilities, and prioritize innovative product development.

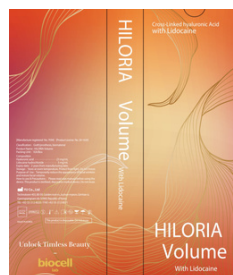

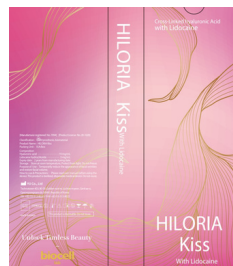

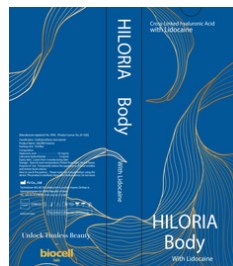

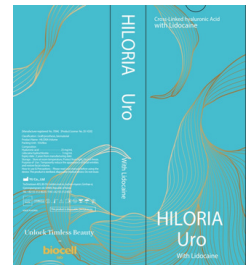

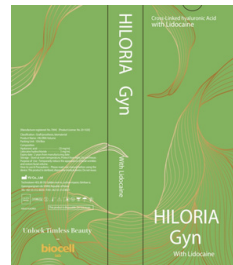

1: Fillers & Skin Booster

Our company will work closely with manufacturers to develop the finest and most distinctive fillers and skin boosters, supplying them exclusively to our contracted partners worldwide.

2: Smart Fillers Plant

We also have capability to establish a complete fillers manufacturing plant. Our plant utilizes an SMART system which optimizes space and time, enabling the production of multiple fillers at one location at a fraction of the cost.

Biocell Lab has registered KFDA & CPNP certification under the brand name HILOIRA on May 2024.

Biocell lab

Associate Manufacturing Company

Our partner manufacturing company is the premier filler manufacturer in Korea, equipped with cutting-edge automatic filler equipments and devices. They have a sophisticated R&D department focused on developing innovative fillers, which is a major reason we take pride in our association with them. The CEO of this company has been an engineer specializing in fillers for the past 25 years.

2020

- Company established
- MFDS Certificate of Medical Device
- Manufacturer (NO. 7094)
- MFDS Certificate of Medical Device
- Manufacture (No.20-963, Class IV, Joint Injection)
- Establishment of Company-Affiliated research institute
- MFDS Certificate of Medical Device Manufacturer (No.20-1020, Class IV HA Filler)

2021

- ISO 22716: 2007 Certified (KORG-200035)
- Cosmetic Manufacturing Registration (5510)
- ISO13485 Certification (MK000157)

2023

- Completion of the new plant (**acquisition of >500 thousands syringe production capacity per month**)
- Patent registration (10-2567151)
- Investment attraction (5.0 billion won)
- Sales: 9 billion KRW

Biocell's associate manufacturing company in south korea

Core Technology

Complex Crosslinking Technology (CCT) on fillers is an advanced technique enhancing the performance of dermal fillers, especially those based on hyaluronic acid (HA). Crosslinking involves chemically binding polymer chains to create a stable network, improving the filler's durability and effectiveness.

Key Benefits of CCT in Fillers:

1. Longevity: Increased resistance to enzymatic breakdown for longer-lasting results.
2. Consistency: Produces a uniform gel for smoother outcomes.
3. Safety: Reduces potential irritants like free BDDE or minimal.
4. Versatility: Allows customization for various aesthetic applications.

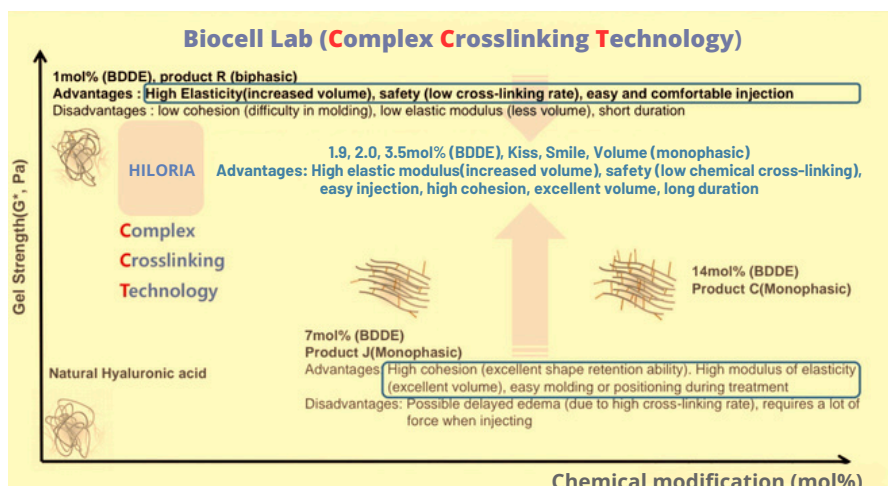

Advanced Methods in CCT:

- Multi-Phase Crosslinking: Multiple stages of crosslinking for an intricate HA network.
- Interpenetrating Polymer Networks (IPNs): Combines multiple polymer networks for enhanced properties.
- Hybrid Crosslinking: Uses different agents/methods for superior performance.

Applications:

- Volumizing: Deep injections for restoring volume.
- Contour Enhancement: Shaping facial features.
- Fine Lines and Wrinkles: Superficial injections for smoothing lines.
- Hydration and Skin Quality: Improving skin texture and hydration.

In summary, CCT significantly improves the stability, elasticity, and overall performance of HA-based fillers, leading to more effective and longer-lasting aesthetic treatments.

Low (BDDE) Concentration in Our HILORIA Fillers

Our product uses significantly low BDDE concentration of 1.9, 2.0, and 3.5 mol%, which is significantly lower than other HA fillers available worldwide.

**DESIGN BY
BIOCELL LAB**

HILORIA PRO

Brand Name: HILORIA

Product Name: PRO

Composition

Hyaluronic Acid (HW+MW+LW)
Injectable Skin Booster
2mL / 1 EA Box
2x30G Needles
Free of BDDE Crosslink

KFDA
Approved Indication

Injected into facial wrinkles or depressed areas of the skin to temporarily increase volume, thereby improving the appearance of wrinkles.

Onset Action

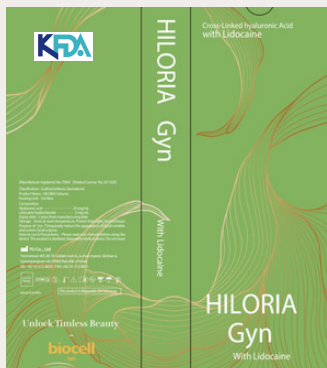

As early as 1-3 weeks after the last treatments.

Duration of Action

Significantly results are noticeable for up to 12 months in a randommised trial

HYBRID BOOSTER

HILORIA Pro Is a medical device and cutting-edge aesthetic product formulated to address various skin concerns, including hydration, rejuvenation, and overall skin health. The key components of Hiloría include potent antioxidants, hydrating agents, and collagen-stimulating peptides, all aimed at promoting skin vitality and radiance.

HILORIA GYN

Brand: HILORIA	Product Name: GYN
Composition	Injectable Fillers / 3mL Hyaluronic acid.....24mg/mL Lidocaine Hydrochloride....3mg/mL Packing Unit: 1 EA/Box 2x30G Needles
KFDA Approved Indication	It is registered as an injectable HA filler. However, off-label, it can be injected into the labia majora or depressed areas of the vagina to temporarily increase volume and improve the appearance of wrinkles.
Onset Action	As early as 1 month after the last treatment
Duration of Action	Significantly results are noticeable for up to 12 months in a randommised trial

HILORIA GYN help restore the natural shape and volume of the labia major, giving it more youthful and toned appearance. It can also be applied for other corrections and improvements in the female genital area, such as treating labia asymmetry or reducing discomfort caused by vulvar atrophy.

HILORIA URO

Brand Name: HILORIA Product Name: URO

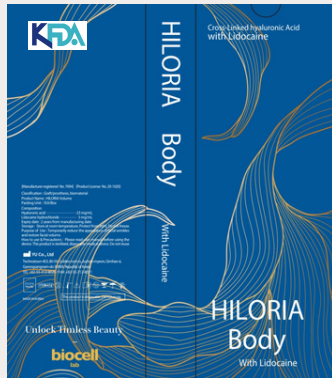

Composition
Injectable Fillers / 1mL , 3mL
Hyaluronic acid.....24mg/mL
Lidocaine Hydrochloride....3mg/mL
Packing Unit: 1 EA/Box
2x30G Needles

**KFDA
Approved Indication**
It is registered as an injectable HA filler. However, off-label, it can be injected into the shaft and head of the penis to temporarily increase volume, thereby improving the appearance of the shaft.

Onset Action As early as 1 month after the last treatment.

Duration of Action Significantly results are noticeable for up to 12 months in a randommised trial

HILORIA URO are injectable treatments designed to increase penile girth. HILORIA Uro is a cosmetic procedure designed to enhance both the girth and length of the penis. The procedure takes less than 20 minutes and involves using a small needle to inject filler into multiple sites around the penile shaft.

HILORIA BODY

Brand Name: HILORIA	Product Name: BODY
Composition	Injectable Fillers / 10mL Hyaluronic acid.....24mg/mL Lidocaine Hydrochloride....3mg/mL Packing Unit: 1 EA/Box 1x30G Needles
KFDA Approved Indication	It is registered as an injectable HA filler. However, off-label, it can be injected into the breasts and buttocks and other areas. It is temporarily increase volume, thereby improving the appearance of injected areas.
Onset Action	As early as 1 month after the last treatment.
Duration of Action	Significantly results are noticeable for up to 14 months in a randommised trial

HILORIA Body is an advanced treatment used for enhancing or shaping different body areas in a safe and natural method. It provides immediate results and improves the shape of the breasts, buttocks and other areas. It is only minimally invasive and doesn't require a long downtime.

HILORIA KISS

Brand Name: HILORIA	Product Name: KISS
Composition	Injectable Fillers / 1mL Hyaluronic acid.....24mg/mL Lidocaine Hydrochloride....3mg/mL Packing Unit: 1 EA/Box 2x30G Needles
Injection Depth	Superficial dermis
KFDA Approved Indication	Injected into the superficial dermis like lips. It is temporarily increase volume, thereby improving the appearance of injected areas.
Onset Action	As early as 1 week after the last treatment.
Duration of Action	Significantly results are noticeable for up to 8 months in a randommised trial

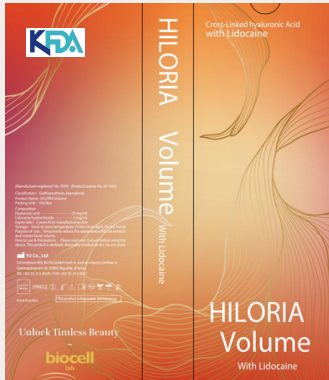

HILORIA Kiss is an injectable gel designed to temporarily enhance fullness and add volume to thin lips, addressing age-related thinning or enhancing lip fullness in adults aged 21 and older.

HILORIA SMILE

Brand Name: HILORIA	Product Name: SMILE
Composition	Injectable Fillers / 1mL Hyaluronic acid.....24mg/mL Lidocaine Hydrochloride....3mg/mL Packing Unit: 1 EA/Box 2x28G Needles
Injection Depth	Mid, Deep Dermis
KFDA Approved Indication	injected into the deep facial areas where moderate to severe wrinkles and folds occur. It is temporarily increase volume, thereby improving the appearance of injected areas.
Onset Action	As early as 1 month after the last treatment.
Duration of Action	Significantly results are noticeable for up to 12 months in a randommised trial

HILORIA Smiles is injected into deep facial areas where moderate to severe wrinkles and folds occur, such as the lines around the nose and mouth (often called “parentheses lines”). This product is intended to temporarily reduce facial wrinkles, providing a smoother appearance for adults aged 21 and above.

HILORIA VOLUME

Brand Name: HILORIA	Product Name: VOLUME
Composition	Injectable Fillers / 1mL Hyaluronic acid.....24mg/mL Lidocaine Hydrochloride....3mg/mL Packing Unit: 1 EA/Box 2x27G Needles
Injection Depth	subcutaneous dermis
KFDA Approved Indication	injected into the breasts and buttocks and other areas. It is temporarily increase volume, thereby improving the appearance of injected areas.
Onset Action	As early as 1 month after the last treatment.
Duration of Action	Significantly results are noticeable for up to 12 months in a randommised trial

HILORIA Volume is an injectable gel used for subcutaneous dermal injection in the forehead and cheek regions to address age-related volume loss. As we age, the forehead and cheeks may flatten and the skin may sag due to natural volume loss, known as age-related midface volume loss. HILORIA Volume is specifically formulated to add volume beneath the skin's surface, providing lift and contour to the cheek area.

HILORIA SKIN BOOSTER

Brand Name: HILORIA	Product Name: Hiloría (Cosmetic Version)
Composition	Skin Booster / 2.5mL H-HA: 40mg + L-HA: 40mg Packing Unit: 1 EA/Box
Apply Arera	Topical and Epidermal
CPNP Approved Indication	Hiloría is engineered for holistic skin rejuvenation, simultaneously targeting various signs of aging such as fine lines, wrinkles, and skin laxity. This comprehensive approach ensures an enhancement of overall skin texture and appearance.
Onset Action	As early as 3 weeks after the last treatment.
Duration of Action	Significantly results are noticeable for up to 12 months in a randommised trial

HILORIA cosmetic version employs an advanced bio—that harnesses the power of hyaluronic acid. With carefully formulated high concentrations, Hiloría stimulates collagen and elastin production, promoting natural tissue remodeling and enhancing overall skin quality.

"GET IN TOUCH AND EXPLORE PARTNERSHIP OPPORTUNITIES"

To express your interest in becoming a partner, please reach out to us via our official communication channels, such as email or phone, and provide an introduction to your company.

Include details about your background, industry experience, and any relevant distribution or importation history. Additionally, clearly state your intent to import, wholesale, or distribute our products in your country.

Having these details ready will enable us to delve deeper into the matter and make our conversation more productive. We look forward to hearing from you and exploring potential collaboration opportunities that benefit both parties.
